### Description- specifications

**FERTICELL Micro Mix 1-0-0 liquid** is a liquid solution of oligo-elements (Mg-S-B-Cu-Fe-Mn-Zn), that helps to boost synthesis of enzymes and the process of photosynthesis leading to increased yields. It helps in absorption of water and other nutrients from the soil, and helps farmers to obtain from 15% to 30% higher production.

**FERTICELL Micro Mix 1-0-0 liquid** is a blend of essential elements, to prevent most micronutrient deficiencies before they occur, and to correct pre-existing deficiencies as indicated by leaf analysis and soil tests.

**FERTICELL Micro Mix 1-0-0 liquid**, contains Magnesium (Mg) which is considered as a secondary nutrient available for plants to ensure high quality of fruits, as well as Iron (Fe) an essential element to produce enzymes, and also needed for the chlorophyll synthesis, Zinc (Zn) that speeds the metabolic rate of the plant, Manganese (Mn) and boron (B) very important for cells division and Molybdenum (Mo) needed for Nitrogen fixing bacteria.

**FERTICELL Micro Mix 1-0-0 liquid**, Therefore, is an adequate solution throughout the growing cycle, to all crops.
