

TECHNICAL DATA SHEET

FERTICELL Fe 15% amino polvo quelatado

Iron powder (Fe)15%.

Product usable in Organic Agriculture according to Regulation (EU) No. 2018/848 and 2021/1165.

Product that complies with NOP (National Organic Program - USDA)

Description- specifications

FERTICELL Fe 15%, is an ecological fertilizer, it is indicated for the preventive and curative control of iron deficiency states (iron chlorosis).

FERTICELL Fe 15% is a product enriched with unicellular bacteria, completely neutral and biologically active, so that the assimilation of the tree is faster and more complete. The algae are especially important in the nutrition of the plants, there is a greater yield, precocity and quality in all the crops. This combination provides optimal stability of the tree, favors absorption across the cuticle of the leaf, ensures movement and translocation of the tree into the interior of the plant

FERTICELL Fe 15% allow the availability of trees for the plants, maintaining high stability on the ground.

Uses

Foliar
Fertigation

Available containers

20 Kg

Certifications

Product suitable for use in Organic Agriculture in accordance with Regulations (EU) n°2018/848 and 2021/1165, the NOP Regulation.

GUARANTEED ANALYSIS:

| Composition | Percentage (w/w) |
|--------------------|------------------|
| Iron (Fe), total | ≥ 15,0 % |
| Total Nitrogen (N) | ≥ 6 % |
| | |

PHYSICAL PROPERTIES

State: Powder
Colour: Brown

GENERAL USAGE AND DOSAGE RECOMMENDATIONS

| Crop | Foliar dose | Fertigation dose |
|--|---|--------------------------|
| Fruit trees: Citrus fruits, Apples, Pears, Blueberries, Almonds, Cherries, Peaches, Avocado, Mango, Banana, etc... | 200-300 mg/hl/ application | 2-3Kg/ha per application |
| | Strong deficiency: Up to 3 applications | |
| Horticultural crops: Tomato, Potato, Cucumber, Melon Courgette, Cauliflower, Onion, Carrot, Pepper, etc... | 300 -400 mg / hl/ application | 3-4Kg/ha per application |
| | Strong deficiency: Up to 4 applications | |
| Extensive crops: Cereals, Alfalfa, Cotton, Beetroot, Corn, Sunflower, etc.. | 400 -600 mg / hl/ application | 4-6Kg/ha per application |
| | Strong deficiency: Up to 4 applications | |

- The specified dosages are general recommendations. The amounts depend on the crop, phenological state, level of deficiency and soil type.
- The physical and appearance characteristics of the product may be altered due to the ecological nature of the product.
- Use under technical advice. Keep the product at **room temperature** and in a cool and dry place. Do not mix with phosphate products.

Important notes:

1. The product must be prediluted before being poured into the irrigation tank or spray.
2. In fertigation applications, divide input being as maximum: 3Kg / ha, intervals of 10-15 days.
