Description- specifications

FERTICELL NUTRIPLUS N2,5 Liquid amino is an ecological liquid fertilizer, indicated for the prevention and correction of nitrogen deficiencies, it favours the growth and vigour of all plants & is **Free of Chlorides**.

FERTICELL NUTRIPLUS N2,5 Liquid amino can be applied both foliar and/or irrigation in all kind of crops. Besides, it contains unicellular algae, being completely neutral and biologically active, making the assimilation of nitrogen and amino acids that accompanies it faster and more complete. Algae are especially important in plant nutrition, as they give a higher yield, precocity and quality in all crops.

FERTICELL NUTRIPLUS N2,5 Liquid amino, is 100% soluble, manufactured from vegetable species such as soybeans, no gmo. It has a quick absorption and high efficiency. Absorption can become within the first 3 hours to 90% after a foliar spray. It is neutral and reduces risk of nitrogen pollution.

The application of **FERTICELL NUTRIPLUS N2,5 Liquid amino**, is designed to avoid the massive use of nitrogenous fertilizers. It must be applied at the most critical moments of plant development: post-transplant, growth, pre-flowering, fruit set and development, and when there are adverse conditions for the development of the crop: heat stroke, frost, hail, water stress or saline, pest and disease attacks, phytotoxicities, etc.

FERTICELL NUTRIPLUS N2,5 Liquid amino used during the growth phase, activates crops metabolic systems activator and gives vigour to plants, improving their response to abiotic stress as well as the healing of the cut / wound in crop leaves thanks to its high content of amino acids.
