FERTICELL PK 0-20-20 LIQUID SOLUBLE

PK 0-20-20.

Product usable in Organic Agriculture according to Regulation (EU) No. 2018/848 and 2021/1165.

Product that complies with NOP (National Organic Program - USDA)

Product that complies with the JAS Regulation (Japanese Agricultural Standard - Japan)

Description- specifications

FERTICELL PK 0-20-20 liquid soluble is a certified organic fertilizer, from mineral (phosphoric rock) to supply high available P₂O₅ to the plant and K₂O.

FERTICELL PK 0-20-20 liquid soluble can be applied both foliar and/or irrigation in all kind of crops during any stage of the vegetative cycle. The phosphorus is an essential nutrient and it's involved in most of the biochemical reactions of the plant: photosynthesis, respiration, synthesis of proteins and carbohydrates; etc. The phosphorus (P) participates as well, in processes such as obtaining cellular energy (being part of the ADP and ATP molecules).

FERTICELL PK 0-20-20 liquid soluble is especially indicated to improve the development of roots, to stimulate the formation of buttons in flowers and a healthy development of fruits in plants, avoiding the abscission phenomenon.

FERTICELL PK 0-20-20 liquid soluble increases the resistance of plants in unfavourable weather conditions, and must be used especially during the flowering phase.
