

TECHNICAL DATA SHEET

FERTICELL PHOSPHOR 0-20-0 LIQUID SUSPENSION

Phosphor liquid suspension 20.

Product usable in Organic Agriculture according to Regulation (EU) No. 2018/848 and 2021/1165.ano

Product that complies with NOP (National Organic Program - USDA)

Description- specifications

FERTICELL PHOSPHOR 0-20-0 is a certified organic fertilizer, from mineral source (micronized rock), to supply high available P_2O_5 to the plant. Being a micronized liquid in suspension, makes it easy to facilitate phosphorus absorption and its translocation in the plant.

FERTICELL PHOSPHOR 0-20-0 can be applied both foliar and/or irrigation in all kind of crops during any stage of the vegetative cycle. The phosphorus is an essential nutrient and it's involved in most of the biochemical reactions of the plant: photosynthesis, respiration, synthesis of proteins and carbohydrates; etc. The phosphorus (P) participates as well, in processes such as obtaining cellular energy (being part of the ADP and ATP molecules).

FERTICELL PHOSPHOR 0-20-0 is especially indicated to improve the development of roots, to stimulate the formation of buttons in flowers and a healthy development of fruits in plants, avoiding the abscission phenomenon.

FERTICELL PHOSPHOR 0-20-0 increases the resistance of plants in unfavourable weather conditions, and must be used especially during the flowering phase.

Uses

Foliar
Fertigation

Available containers

300L
600L
1000L

ATTESTATIONS:

Product suitable for use in Organic Agriculture in accordance with Regulations (EU) n°2018/848 and 2021/1165, the NOP Regulation

Control Ecocert SAS

Agroplasma SL
Polígono Industrial Santa Teresa
Calle Torre del Mar N°56
29004 Málaga, Spain

GUARANTEED ANALYSIS:

Composition	Percentage (w/w)	Percentage (w/v)
Total Phosphor (P_2O_5)	20,00%	36%
Phosphor (P)	8,72%	15,69%

PHYSICAL PROPERTIES

State:	Liquid suspension
Colour:	Grey
Density:	1,72 ± 0,01 kg/l
pH:	7,30 ± 1,00

GENERAL USAGE AND DOSAGE RECOMMENDATIONS

Crop	Foliar dose	Fertigation dose
Fruit trees (Citrus fruits, Apples, Pears, Blueberries, Almonds, Cherries, Peaches, Avocado, etc)	-Maintenance: 2-3 l/ha or 200-300 cc/100 l application	-Maintenance: 5-10 l/ha or 500-1000 cc/1000 m ² /application
Horticultural crops: (Tomato, Potato, Cucumber, Melon Courgette, Cauliflower, Onion, Carrot, Pepper, etc)	-Maintenance: 2-3 l/ha or 200-300 cc/100 l application -Strong deficiency: Up to 4 applications	-Maintenance: 5-10 l/ha or 500-1000 cc/1000 m ² /application -Strong deficiency: Up to 4 applications
Extensive crops: (Cereals, Alfalfa, Cotton, Beetroot, Corn, Sunflower, etc)	-Maintenance: 2-3 l/ha or 200-300 cc/100 l application	-Maintenance: 3-10 l/ha or 500-1000 cc/1000 m ² /application

- The specified dosages are general recommendations. The amounts depend on the crop, phenological state, level of deficiency and soil type. Keep the product at room temperature, in a cool and dry place.

- The physical and appearance characteristics of the product may be altered due to the ecological nature of the product.

- Use under technical advice. Keep the product at **room temperature**.

Important notes:

1. Due to the density and its high concentration in P_2O_5 , the product must be prediluted before being poured into the irrigation tank or spray. Do not use more than 10 litres of product for every 400 litres of water in the mix. Add acidifier.

2. In fertigation applications, divide input being s maximum: 10l/ha, at intervals of 10-15 days. Pay attention to the water flow.

3. Shake the container vigorously before use. **If stored, shake container at least once per month.**

4. If the package is not shaken every month at least **1 HOUR**, the expiration date of the product is limited to **5-6 months from the date of manufacture** due to its high density, so phosphorus (P) can decant and sediment at the bottom. It is possible to reverse this situation by using hot water and shake it vigorously.
